Basic Information of Offshore Product:	This is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier ("CSSF").
Product Risk Level:	P3
Base Currency of Offshore Product:	USD
Type of Offshore Product:	Bond Fund
Issuer of Offshore Product:	Franklin Templeton Investments (Asia) Limited
Investment Manager:	Franklin Advisers, Inc., United States of America (internal delegation)
Custodian:	J.P. Morgan SE, Luxembourg Branch
Objective and Investment Strategy of Offshore Product:	The Fund aims to maximise total investment return consisting of a combination of interest income, capital appreciation and currency gains by investing principally in a portfolio of fixed or floating rate debt securities and debt obligations issued by government or government-related issuers worldwide.
Key Risks of Offshore Product:	**This section is a summary of the key risks of the Offshore Product which is extracted from the Offshore Product Offering Document for Customer's reference only, and it is not an exhaustive elaboration. Customer is suggested to read all documents listed in below section "Offshore Product Offering Document" for detailed risk disclosure. In addition, Customer should read the Term Sheet, the Risk Disclosure Statement and other sales documents of the QDII Product, to understand the risk factors of the QDII Product.** ▪ **Debt securities risk**: The Fund is exposed to the credit/default risk of issuers of the debt securities that the Fund may invest in. Investment in the Fund is subject to interest rate risk. The debt securities will generally increase in value when interest rates fall and decrease in value when interest rates rise. Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times. The Fund may invest in debt securities on which the issuer is not currently making interest payments (defaulted debt securities). These securities may become illiquid. The Fund's investment in securities issued or guaranteed by governments may be exposed to political, social and economic risks. In adverse situation, the governmental entity may be unwilling or unable to pay interest and repay principal, or the indebtedness may be restructured. In the event of a default on sovereign debt, the Fund may suffer significant losses. The Fund may invest in higher-yielding securities rated lower than investment grade or unrated. Such securities are generally subject to lower liquidity, higher volatility and greater risk of loss of principal and interest than high-rated debt securities. ▪ **Market risk**: The market values of securities owned by the Fund will tend to go up or down, sometimes rapidly or unpredictably, due to

factors affecting individual issuers, particular industries or sectors within securities markets, or because of general market conditions. During a general downturn in the securities markets, multiple asset classes (including different sectors of the same asset class) may decline in value at the same time. Similarly, when markets perform well, there can be no assurance that securities held by the Fund will participate in the advance. Because the securities the Fund holds fluctuate in price in this manner, the Fund's value may go down as well as up and investors may be adversely affected.

- **Credit risk**: The Fund is exposed to the credit/default risk of issuers of the debt securities that the Fund may invest in. Changes in the financial condition of an issuer, changes in economic and political conditions in general, or changes in economic and political conditions specific to an issuer, are factors that may have an adverse impact on an issuer's credit quality and security value. Default can occur if an issuer fails to make principal and interest payments when due, which may result in a substantial loss to the Fund. Debt securities are also exposed to the risk of being downgraded, which can adversely affect and/or result in a substantial loss to the Fund.
- **Foreign currency risk**: The Fund will typically invest to a significant degree in securities that are denominated in currencies other than the base currency of the Fund, exposing its investments to changes in foreign exchange rates and the possibility of exchange control regulations. Changes in currency exchange rates may adversely affect the value of the Fund, and also may affect the income earned by the Fund and gains and losses realized by the Fund. The Fund may use instruments such as currency forwards, cross currency forwards and currency futures contracts to hedge currency exposure, which can limit the potential for currency gains, or to take a currency position for investment purposes, which can result in substantial loss to the Fund. To the extent that the Fund seeks to hedge or protect against currency exchange risk, there is no guarantee that hedging or protection will be achieved, and the value of the Fund may be adversely affected. Furthermore, the total return for a share class that is denominated in a different currency (the "alternative currency") from the base currency of the Fund may be affected, either positively or negatively, by changes in the exchange rate between the Fund's base currency and the alternative currency.
- **RMB Currency and Conversion risk**: RMB is currently not freely convertible and is subject to exchange controls and restrictions. Non-RMB based investors are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the Fund's base currency (i.e., USD) will not depreciate. Any depreciation of RMB could adversely affect the value of the Fund's investment. Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors. Under exceptional circumstances, payment of redemptions and/or dividend payment may be delayed due to exchange controls and restrictions applicable to RMB.
- **Concentration risk**: The Fund seeks to maintain a portfolio with holdings in a relatively limited number of issuers. By being less diversified, the Fund may be more volatile than broadly diversified

funds, or may be exposed to greater risk since underperformance of one or a few positions will have a greater impact on the Fund's assets. The Fund may be adversely affected as a result of such greater volatility or risk.

- **Liquidity risk**: The Fund may not be able to easily sell securities due to adverse market conditions or reduced value or creditworthiness of issuers in which it invests. The inability of the Fund to sell securities or positions may also impede the ability of the Fund to meet redemption requests in a timely manner. Certain securities may also be illiquid due to limited trading markets or contractual restrictions on their resale. Reduced liquidity due to these factors may have an adverse impact on the net asset value of the Fund.
- **Valuation risk**: Valuation of the Fund's investments may involve uncertainties and judgmental determinations. Independent pricing information may not always be available. If valuations prove to be incorrect, the investors of the Fund may be adversely affected.
- **Volatility risk**: The debt securities in emerging markets may be subject to higher volatility and lower liquidity compared to more developed markets. The prices of securities traded in such markets may be subject to fluctuations. The bid and offer spreads of the price of such securities may be large and the Fund may incur significant trading costs.
- **Counterparty risk**: The Fund may be exposed to the credit/default risks of its counterparties and the Fund/investors may be adversely impacted.
- **Emerging markets risk**: The Fund may invest in, or be exposed to, emerging markets, which may involve increased risks and special considerations not typically associated with investment in more developed markets. The risks of investing in emerging markets, which can adversely affect and/or result in a substantial loss to the Fund, may include: liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
- **Derivative instruments risk**: Derivative instruments involve cost, may be volatile, and may involve a leverage effect. A small market movement may give rise to a proportionately larger impact, which may cause substantial loss to the Fund. Other risks include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. In adverse situations, the Fund's use of derivative instruments may become ineffective and the Fund may suffer significant losses.
- **Swap agreements risk**: In a standard "swap" transaction, two parties agree to exchange the returns (or differential in rates of return) earned or realized on particular predetermined investments or instruments. Whether the Fund's use of swap agreements will be successful in furthering its investment objective will depend on the ability of the investment manager to correctly predict whether certain types of investments are likely to produce greater returns than other investments. Swap agreements are illiquid and in the event of the default or bankruptcy of a swap agreement counterparty, the Fund may suffer a substantial loss.
- **Credit-linked securities risk**: The Fund may invest in credit-linked securities (such as credit default swaps). The Fund may be adversely

affected by any delay or cessation in the making of payments by the issuers of the debt obligations underlying the credit-linked security or by the issuer of the credit-linked security. If the market for credit-linked securities becomes illiquid, the Fund could experience difficulty in selling such security at a price the investment manager believes is fair, and the Fund may be adversely impacted.

- **Structured notes risk**: Structured notes involve a counterparty structuring a note whose value is intended to move in line with the underlying security specified in the note. Unlike financial derivative instruments, cash is transferred from the buyer to the seller of the note. Investment in these instruments may cause a loss if the value of the underlying security decreases. There is also a risk that the note issuer will default. The liquidity of a structured note can be less than that for the underlying security, a regular bond or debt instrument and this may adversely affect the Fund.
- **Europe and Eurozone risk**: The Fund may invest in the Eurozone. Mounting sovereign debt burdens (e.g. any sovereigns within the Eurozone, which default on their debts, may be forced to restructure their debts and faced difficulties in obtaining credit or refinancing) and slowing economic growth among European countries, combined with uncertainties in European financial markets, including feared or actual failures in the banking system and the possible break-up of the Eurozone and Euro currency, may adversely affect interest rates and the prices of securities across Europe and potentially other markets as well. These events may increase volatility, liquidity and currency risks associated with investments in Europe. The aforesaid economic and financial difficulties in Europe may spread across Europe and as a result, a single or several European countries may exit the Eurozone or a sovereign within the Eurozone may default on its debts. In any event of the break-up of the Eurozone or Euro currency, the Fund may be exposed to additional operational or performance risks. While the European governments, the European Central Bank, and other authorities are taking measures (e.g. undertaking economic reforms and imposing austerity measures on citizens) to address the current fiscal conditions, these measures may not have the desired effect and therefore the future stability and growth of Europe is uncertain. The performance and value of the Fund may be adversely affected should there be any adverse credit events (e.g. downgrade of the sovereign credit rating or default or bankruptcy of any Eurozone countries).
- **Convertible securities risk**: The Fund may invest in convertible securities which are a hybrid between debt and equity, permitting holders to convert into shares of the issuer at a specified future date. Convertibles are exposed to equity movement and greater volatility than straight bond investments. Investments in convertible securities are subject to the same interest rate risk, credit risk, liquidity risk and prepayment risk associated with comparable straight bond investments. The value and performance of the Fund may be adversely affected as a result.
- **Sustainability risk**: The integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the Fund and may also cause the Fund to sell investments that will continue to

	perform well. Appreciation of sustainability risk is to a degree subjective and there is no guarantee that all investments made by the Fund will reflect beliefs or values of any particular investor on sustainable investments. A sustainability risk could materialise as the occurrence of an environmental, social or governance event or condition causing material negative impact on the value of one or several investments and thus negatively affecting the returns of the Fund. ▪ **Class hedging risk**: The hedging strategy for a hedged share class may not work as intended, exposing investors of that share class to currency risk. Additionally, investors of a hedged share class may be exposed to fluctuations in the net asset value per share reflecting the gains/losses on and the associated transaction costs of the financial instruments used for hedging, and such investors may be adversely impacted. ▪ **Dividend policy risk**: The Fund's dividend policy allows for payment of dividends out of capital or effectively out of capital. Where this is done, it amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share. The distribution amount and net asset value of a hedged share class may be adversely affected by differences in the interest rates of the reference currency of the hedged share class and the Fund's base currency, resulting in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-hedged share classes. ▪ **China Bond Connect risk**: Investing in the China Interbank Bond Market (CIBM) via Bond Connect is subject to regulatory risks and various risks such as volatility risk, liquidity risk, settlement and counterparty risk as well as other risk factors typically applicable to debt securities. The relevant rules and regulations on investment in the CIBM via Bond Connect are subject to change which may have potential retrospective effect. In the event that the relevant PRC authorities suspend account opening or trading on the CIBM, the Fund's ability to invest in the CIBM will be adversely affected. In such event, the Fund's ability to achieve its investment objective will be negatively affected. ▪ **Chinese market risk**: The Fund is subject to the risks of the Chinese market and the value of the Fund may be susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory events affecting the Chinese market. The value and performance of the Fund may be adversely affected as a result. ▪ **Securities lending risk**: Securities lending transactions may involve the risk that the borrower may fail to return the securities lent out in a timely manner and the value of the collateral may fall below the value of the securities lent out, which may result in a substantial loss to the Fund.

Fees of Offshore Product:	Management fee: 1.05% of NAV p.a. (Included 0.3% maintenance fee) (The Management fee is charged by the offshore issuer, and will be reflected and deducted from the NAV) Other fees may include performance fee, maintenance fee, custodian fee and other fees and taxes that may be charged in securities investment of offshore products, will be reflected and deducted from the offshore product NAV. You may find more information from the offering documents on offshore products' official website.

Selling restriction to retail investor in the European Economic Area (the "EEA")	This product is not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (the "EEA"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "MiFID II"); or (ii) a customer within the meaning of Directive 2002/92/EC (as amended the "Insurance Mediation Directive"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or

	(iii) not a qualified investor as defined in Directive 2003/71/EC (as amended, the "Prospectus Directive"). Consequently, no key information document required by Regulation (EU) No 1286/2014 (the "PRIIPs Regulation") for offering or selling this product or otherwise making it available to retail investors in the EEA has been prepared and therefore offering or selling this product or otherwise making it available to any retail investor in the EEA may be unlawful under the PRIIPS Regulation. Given the disclaimer, the bank accepts no liability if any customer who's qualified as retail investor in the European Economic Area (the "EEA") subscribes the product.

Disclaimer:

This document does not constitute an offer, an invitation or a recommendation to enter into any transaction. The Bank is acting as principal and not as the adviser of the Customer or in a fiduciary capacity in respect of the Offshore Product mentioned herein or any other transaction, and the Bank accepts no liability whatsoever with respect to the use of this document or its contents.

This document does not have regard to the specific investment objectives, financial situation and the particular needs of any specific person who may receive this document. The information herein is published for information and general circulation only and is not to be taken in substitution for the exercise of your judgment, and you should obtain separate legal, tax or financial advice. Before entering into any transaction or making a commitment to purchase any QDII Product which invests in the offshore product mentioned in this document, you should take steps to ensure that you understand the transaction or product and have made an independent assessment of the appropriateness of the transaction or product in the light of your own objectives and circumstances. In particular, you may wish to seek advice from a financial adviser or make such independent investigations as you consider necessary or appropriate for such purposes. If you choose not to do so, you should consider carefully whether the transaction or product mentioned in this document is suitable for you.

The Bank, its related companies, their directors and/or employees may have positions in, and may effect transactions in, or act as market-maker in, the Offshore Product mentioned in this document. The Bank may have alliances or other contractual agreements with the issuers or manager of the Offshore Product. In addition, the Bank, its related companies, their directors and/or employees may also perform (or seek to perform) broking, investment banking and other financial services for these issuers and managers.

Please note neither the Issuer, manager, investment adviser of the Fund nor any of their affiliates acts as adviser or trustee of the QDII Product or assumes any obligation in relation to the QDII Product. The Customer is not the Fund holder and has no direct right or interest in the Fund. There is no contractual relationship between the Customer and the Issuer, manager, investment adviser of the Fund or any of their affiliates.

This document and the contents contained herein are proprietary to the Bank. No one may copy or forward all or part of this document without the Bank's written permission. Capitalised terms used in this document without definition shall have the meaning

given to them under the Term Sheet, Agreement, and/or other QDII Product Documents. In case of inconsistency between the English and Chinese versions, the content of the Chinese version shall prevail and apply.
