	QDUTJM05AA	AUD			
JPMorgan ASEAN Fund (CNY-Hedged)	QDUTJM05RR	RMB	RMB	BP261Z2	HK0000205630

Basic Information of Offshore Product:	This is a fund constituted in the form of a unit trust under the laws of Hong Kong.
Product Risk Level:	P4
Base Currency of Offshore Product:	USD
Type of Offshore Product:	Equity Fund
Issuer:	The manager of the Fund, i.e. JPMorgan Funds (Asia) Ltd.

Investment Manager:	JF Asset Management Ltd., Hong Kong (internal delegation).
Trustee:	Bank of East Asia (Trustees) Ltd.
Objective and Investment Strategy of Offshore Product:	<p>The investment policy of the Fund is to enable investors to participate in a managed portfolio consisting primarily of securities with significant assets in, or significant earnings derived from one or more of the countries comprising the Association of South East Asian Nations. The Manager will aim to achieve capital growth in US dollar terms. The Fund may also invest in derivatives such as forward contracts, options, warrants and futures for investment purposes and may under limited circumstances as considered appropriate by the Manager and the Investment Manager, hold substantial amounts of its portfolio in cash and cash based instruments.</p>
Key Risks of Offshore Product:	<p><u>This section is a summary of the key risks of the Offshore Product which is extracted from the Offshore Product Offering Document for Customer’s reference only, and it is not an exhaustive elaboration. Customer is suggested to read all documents listed in below section “Offshore Product Offering Document” for detailed risk disclosure. In addition, Customer should read the Term Sheet, the Risk Disclosure Statement and other sales documents of the QDII Product, to understand the risk factors of the QDII Product.</u></p> <p>Emerging markets risk</p> <ul style="list-style-type: none"> ▪ Accounting, auditing and financial reporting standards may be less rigorous than international standards. There is a possibility of nationalisation, expropriation or confiscatory taxation, foreign exchange control, political changes, government regulation, social instability or diplomatic developments which could affect adversely the economies of emerging markets or the value of the Fund’s investments. <p>Currency risk</p> <ul style="list-style-type: none"> ▪ The assets in which the Fund is invested and the income from the assets will or may be quoted in currency which are different from the Fund’s base currency. The performance of the Fund will therefore be affected by movements in the exchange rate between the currencies in which the assets are held and Fund’s currency of denomination. Investors whose base currency is different (or not in a currency linked to the Fund’s currency of denomination) may be exposed to additional currency risk. <p>Liquidity risk</p> <ul style="list-style-type: none"> ▪ The Fund may invest in instruments where the volume of transactions may fluctuate significantly depending on market sentiment. There is a risk that investments made by the Fund may become less liquid in response to market developments or adverse investor perceptions. <p>Equity risk</p> <ul style="list-style-type: none"> ▪ Equity markets may fluctuate significantly with prices rising and falling sharply, and this will have a direct impact on the Fund’s net asset

value. When equity markets are extremely volatile, the Fund's net asset value may fluctuate substantially and the Fund could suffer substantial loss.

Hedging risk

- The Manager, the Investment Manager and the Sub-Managers are permitted, in their absolute discretion, but not obliged, to use hedging techniques to attempt to reduce market and currency risks. There is no guarantee that hedging techniques if used, will achieve the desired result nor that hedging techniques will be used, in those cases, the Fund may be exposed to the existing market and currency risks and may be adversely impacted. The hedging, if any, against foreign exchange risks may or may not be up to 100% of assets of the Fund.

Class currency risk

- The Class Currency of each Class may be different from the Fund's base currency, the currencies of which the Fund's assets are invested and/or investors' base currencies of investment. If an investor converts its base currency of investment to the Class Currency in order to invest in a particular Class and subsequently converts the redemption proceeds from that Class Currency back to its original base currency of investment, the investor may suffer a loss due to the depreciation of the Class Currency against the original currency. For example, if an investor whose base currency of investment is Hong Kong dollars (i.e. not Australian dollars) and chooses to invest in the AUD Hedged Class, the investor may be exposed to a higher currency risk. The investor may suffer a higher loss as a result of exchange rate fluctuations between Hong Kong dollars and Australian dollars upon the reconversion of its Australian dollars investment back to Hong Kong dollars as compared to an investor whose base currency of investment is originally in Australian dollars.

RMB currency risk

- Since 2005, the RMB exchange rate is no longer pegged to the US dollars. RMB has now moved to a managed floating exchange rate based on market supply and demand with reference to a basket of foreign currencies. RMB exchange rate is also subject to exchange control policies. The daily trading price of the RMB against other major currencies in the inter-bank foreign exchange market is allowed to float within a narrow band around the central parity published by the relevant authorities of the People's Republic of China. As the exchange rates are influenced by government policy and market forces, the exchange rates for RMB against other currencies, including US dollars and HK dollars, are susceptible to movements based on external factors. Accordingly, the investment in Classes denominated in RMB may be adversely affected by the fluctuations in the exchange rate between RMB and other foreign currencies.
- RMB is currently not freely convertible and RMB convertibility from offshore RMB (CNH) to onshore RMB (CNY) is a managed currency process subject to foreign exchange control policies of and restrictions imposed by the Chinese government. The value of CNH could differ, perhaps significantly, from that of CNY due to a number

of factors including without limitation those foreign exchange control policies and repatriation restrictions.

- Since 2005, foreign exchange control policies pursued by the Chinese government have resulted in the general appreciation of RMB (both CNH and CNY). This appreciation may or may not continue and there can be no assurance that RMB will not be subject to devaluation at some point. Class(es) denominated in RMB will generally be valued with reference to RMB (CNH) rather than RMB (CNY). While RMB (CNH) and RMB (CNY) represent the same currency, they are traded in different and separate markets which operate independently. As such RMB (CNH) does not necessarily have the same exchange rate and may not move in the same direction as RMB (CNY).
- Class(es) denominated in RMB participate in the offshore RMB (CNH) market, which allow investors to freely transact CNH outside of mainland China. Class(es) denominated in RMB will have no requirement to remit CNH to onshore RMB (CNY). Non-RMB based investors (e.g. Hong Kong investors) in Class(es) denominated in RMB may have to convert HK dollars or other currencies into RMB when investing in Class(es) denominated in RMB and subsequently convert the RMB redemption proceeds and/or distributions (if any) back to HK dollars or such other currencies. Investors will incur currency conversion costs and may suffer losses depending on the exchange rate movements of RMB relative to HK dollars or such other currencies. Even if the Fund aims at paying redemption monies and/or distributions of RMB denominated Class(es) in RMB, the Manager may, under extreme market conditions when there is not sufficient RMB for currency conversion and with the approval of the Trustee, pay redemption monies and/or distributions in US dollars. There is also a risk that payment of redemption monies and/or distributions in RMB may be delayed when there is not sufficient amount of RMB for currency conversion for settlement of the redemption monies and distributions in a timely manner due to the exchange controls and restrictions applicable to RMB. In any event, the redemption proceeds will be paid not later than one calendar month after the relevant dealing day on which units are redeemed and the Manager has received a duly completed redemption request in a prescribed format and such other information as the Trustee or the Manager may reasonably require.

Currency Hedged Classes risk

- Each Currency Hedged Class may hedge the Fund's denominated currency back to its currency of denomination, with an aim to provide a return on investment which correlates with the return of the Class of unit which is denominated in the base currency of the Fund. The costs and resultant profit or loss on the hedging transactions will be reflected in the net asset value per unit for the units of the relevant Currency Hedged Classes. The costs relating to such hedging transactions which may be significant depending on prevailing market conditions shall be borne by that Currency Hedged Class only.
- The precise hedging strategy applied to a particular Currency Hedged Class may vary. In addition, there is no guarantee that the desired hedging instruments will be available or hedging strategy will achieve

	<p>its desired result. In such circumstances, investors of the Currency Hedged Class may still be subject to the currency exchange risk on an unhedged basis (which means that, for example, if the hedging strategy in respect of the RMB Hedged Class is ineffective, depending on the exchange rate movements of RMB relative to the base currency of the Fund, and/or other currency(ies) of the non-RMB denominated underlying investment of the Fund, (i) investors may still suffer losses even if there are gains or no losses in the value of the non-RMB denominated underlying investments; or (ii) investors may suffer additional losses if the non-RMB denominated underlying investments of the Fund fall in value). If the counterparties of the instruments used for hedging purposes default, investors of the Currency Hedged Classes may be exposed to the currency exchange risk on an unhedged basis and may therefore suffer further losses.</p> <ul style="list-style-type: none"> ▪ While the hedging strategy may protect investors of the Currency Hedged Classes against a decrease in the value of the Fund's base currency relative to the denominated currency of that Currency Hedged Class, the hedging strategy may substantially limit the benefits of any potential increase in the value of a Currency Hedged Class expressed in the Class currency, if the Currency Hedged Class' denominating currency falls against the base currency of the Fund.
<p>Fees of Offshore Product:</p>	<p>Management fee: 1.5% of NAV p.a. (The Management fee is charged by the offshore issuer, and will be reflected and deducted from the NAV)</p> <p>Other fees may include performance fee, maintenance fee, custodian fee and other fees and taxes that may be charged in securities investment of offshore products, will be reflected and deducted from the offshore product NAV. You may find more information from the offering documents on offshore products' official website.</p>
<p>Dividend Distribution Method:</p>	<p>No Dividend Distribution.</p>
<p>Governing Law of Offshore Product:</p>	<p>The laws of Hong Kong.</p>
<p>Offshore Product Offering Document:</p>	<p>JPMorgan Funds (Unit Trust Range) Explanatory Memoranda, as updated and amended from time to time, which can be obtained from the Bank or via the official website of the Issuer or the Fund (http://www.jpmorganam.com.hk/jpm/am/en/fund-report?fundId=100).</p> <p>The above reference to or provision of Offshore Product Offering Documents are intended to assist Customers to access further information relating to the Offshore Product. The Bank undertakes no liability for the accuracy, authenticity or completeness of such documents or other content or information provided by the Issuer or any other parties of the Offshore Product in other ways. The references to or provision of such documents do not constitute an offer, distribution, marketing or reselling of any relevant Fund(s) to the Customers.</p>
