Basic Information of Offshore Product:	This is a fund constituted in the form of an open-ended investment company with variable capital organised under the laws of Ireland as a public limited company.
Product Risk Level:	P4

	2/2001
Base Currency of Offshore Product:	USD
Type of Offshore Product:	Equity Fund
Issuer:	The management company of the Fund, i.e. Franklin Templeton International Services S.à r.l
Investment Manager:	Royce & Associates, LP (located in USA)
Custodian:	The Bank of New York Mellon SA/NV, Dublin Branch
Objective and Investment Strategy of Offshore Product:	The Fund seeks to achieve long-term capital appreciation. The Fund invests at least 70% of its net asset value in a diversified portfolio of equity securities issued by small-cap and micro-cap US companies (i.e., US companies with stock market capitalisations not greater than that of the largest company (based on market capitalisation) in the Russell 2000 Index' at the time of its most recent reconstitution) that are listed or traded on regulated markets in the United States. The Investment Manager invests the Fund's assets in these companies in an attempt to take advantage of what it believes are opportunistic situations for undervalued securities. Such opportunistic situations may include turnarounds, emerging growth companies with interrupted earnings patterns, companies with unrecognised asset values or undervalued growth companies. A maximum of 10% of the Fund's net asset value may be invested in units or shares of other collective investment schemes. The Investment Manager uses a value method in managing the Fund's assets. In selecting securities for the Fund, the Investment Manager evaluates the company's balance sheet, the level of its cash flows and various measures of the company's profitability. The Investment Manager then uses these factors to assess the company's current worth, basing this assessment on either what it believes a knowledgeable buyer might pay to acquire the entire company or what it thinks the value of the company should be in the stock market. The Investment Manager invests in securities of companies that are trading significantly below its estimate of the issuer's current worth. The Fund may invest up to 5% of its net asset value in convertible debt securities that have contingent write down or loss absorption features. The Russell 2000 Index measures the performance of the small-cap segment of the US equity universe and is a subset of the Russell 3000 Index representing approximately 2,000 of the smallest securities based on a combination of their market cap and current index
Key Risks of Offshore Product:	calculation methodology of net derivative exposure. This section is a summary of the key risks of the Offshore Product for Customer's reference only, and it is not an exhaustive elaboration. Customer is suggested to read all documents listed in below section
	"Offshore Product Offering Document" for detailed risk disclosure.

In addition, Customer should read the Term Sheet, the Risk Disclosure Statement and other sales documents of the QDII Product, to understand the risk factors of the QDII Product.

Smaller Company Risk

Securities of smaller companies generally are less liquid and more volatile than those of larger companies; and smaller companies generally are more likely to be adversely affected by poor economic or market conditions. These factors may adversely affect the value of the securities owned by, hence a substantial loss to, the Fund.

US Markets Risk

This Fund invests primarily in the United States, which means that it is more sensitive to local economic, market, political or regulatory events in the United States, and will be more affected by these events than other funds that invest in a broader range of regions.

Equity Market Risk

• Investing in equity market is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuerspecific factors. Adverse developments or perceived adverse developments in one or more of these areas could cause a substantial decline in the value of equity securities owned by, hence a substantial loss to, the Fund.

Investment Style Risk

The Fund may take significant, long-term positions that the Investment Manager believes are undervalued by the market. Companies in which the Fund invests may remain out of favour with the market for extended periods of time. The Fund may continue to hold, and in some cases add to, a declining position so long as the Investment Manager continues to view the market as incorrectly valuing the security. As a result, the Fund may face the risk of mis-estimation by the Investment Manager in its fundamental analysis regarding the companies in which the Fund invests. The performance of the Fund may not closely correlate to specific market indices over time and may include extended periods of underperformance as compared to the broader market.

Concentration Risk

This Fund may select fewer securities, countries or regions in which to invest and this concentration carries more risk than funds investing in a larger number of securities, countries or regions. This can increase the volatility of the Fund than that of a fund having a more diverse portfolio of investments and risk of loss to the Fund.

Custody and Settlement Risks

The Fund may invest in markets where custodial and/or settlement systems are not fully developed. Such investments may be subject to additional risks with respect to the safe keeping of assets and making of investments, hence the Fund may suffer a substantial loss.

Currency Risk

Fluctuations in exchange rates between the currency of the underlying securities and the Fund's base currency may adversely affect the value of an investment and any income derived from it. In addition, the value of your investment may fall due to changes in the exchange rate between the currency of your share class and the base currency of the Fund. With respect to any share class with "(Hedged)" in its name, the Fund will attempt to hedge the currency risk between the base currency of the Fund and the currency of the share class, although there can be no guarantee that it will be successful in doing so. The use of share class hedging strategies may substantially limit shareholders in the relevant Hedged Share Class from benefiting if the currency of the Hedged Share Class falls against the base currency and/or the currencies that are significant to the Fund's investment strategy, as applicable. Any hedging transactions, while potentially reducing the currency risks to which the Fund would otherwise be exposed, may involve certain other risks, including the risk of a default by a counterparty, and the risk that the Fund's forecast with respect to currency movements is incorrect. If the abovementioned hedging transactions become ineffective, the Fund may suffer a substantial loss.

Market Risk

• An investor may experience losses due to factors that affect the overall performance of financial markets, including: changes in interest rates; trade, fiscal, monetary and exchange controls programmes and policies of governments; national and international political and economic events; the global and domestic effects of a pandemic; and any other failure of markets to function. Economies and financial markets throughout the world are increasingly interconnected. Economic, financial or political events, trading and tariff arrangements, public health events, terrorism, natural disasters and other circumstances in one country or region could have profound impact on global economies or markets. Whether or not a Fund invests in securities of issuers located in or with significant exposure to countries experiencing economic, political or financial difficulties, the value and liquidity of the Fund's investments may be negatively affected.

Renminbi ("RMB") Currency and Conversion Risks

RMB is currently not freely convertible and is subject to exchange controls and restrictions. Non-RMB based investors are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the investors' base currencies (for example Hong Kong dollars) will not depreciate. Any depreciation of RMB could adversely affect the value of investor's investment in the Fund. Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors. Under exceptional circumstances, payment of redemptions and/or dividend payment in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.

	 Investment Risk The value of investments in the Fund and the income from them can go down as well as up, and investors may not get back the amount originally invested and may suffer a substantial loss to their investments. Past performance is no guide to future returns and may not be repeated. There is no guarantee of the repayment of principal. 	
Fees of Offshore Product:	Management fee: 1.5% of NAV p.a. (The Management fee is charged by the offshore issuer, and will be reflected and deducted from the NAV)	
	Other fees may include performance fee, maintenance fee, custodian fee and other fees and taxes that may be charged in securities investment of offshore products, will be reflected and deducted from the offshore product NAV. You may find more information from the offering documents on offshore products' official website.	
Dividend Distribution Method:	No Dividend Distribution	
Governing Law of Offshore Product:	The laws of Ireland	
Offshore Product Offering Document:	Franklin Templeton Global Funds Hong Kong Offering Documents, as updated and amended from time to time, which can be obtained from the Bank or via the official website of the Issuer or the Fund. The above reference to or provision of Offshore Product Offering Documents are intended to assist Customers to access further information relating to the Offshore Product. The Bank undertakes no liability for the accuracy, authenticity or completeness of such documents or other content or information provided by the Issuer or any other parties of the Offshore Product in other ways. The references to or provision of such documents do not constitute an offer, distribution, marketing or reselling of any relevant Fund(s) to the Customers. The Offshore Product Offering Documents may be updated or amended from time to time by the Issuer. The Bank and the Issuer will not, and are not obliged to, notify the Customers of any such update or amendment.	
Suitable Customer of QDII Product investing in this Offshore Product):	Suitable for the China resident and qualified non-China resident investor, whose risk profile is C4 or above.	
Selling restriction to retail investor in the European Economic Area (the "EEA")	This product is not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (the "EEA").	
,	For these purposes, a retail investor means a person who is one (or more) of:	

- (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "MiFID II"); or
- (ii) a customer within the meaning of Directive 2002/92/EC (as amended the "Insurance Mediation Directive"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or
- (iii) not a qualified investor as defined in Directive 2003/71/EC (as amended, the "Prospectus Directive").

Consequently, no key information document required by Regulation (EU) No 1286/2014 (the "PRIIPs Regulation") for offering or selling this product or otherwise making it available to retail investors in the EEA has been prepared and therefore offering or selling this product or otherwise making it available to any retail investor in the EEA may be unlawful under the PRIIPS Regulation. Given the disclaimer, the bank accepts no liability if any customer who's qualified as retail investor in the European Economic Area (the "EEA") subscribes the product.

Disclaimer:

This document does not constitute an offer, an invitation or a recommendation to enter into any transaction. The Bank is acting as principal and not as the adviser of the Customer or in a fiduciary capacity in respect of the Offshore Product mentioned herein or any other transaction, and the Bank accepts no liability whatsoever with respect to the use of this document or its contents.

This document does not have regard to the specific investment objectives, financial situation and the particular needs of any specific person who may receive this document. The information herein is published for information and general circulation only and is not to be taken in substitution for the exercise of your judgment, and you should obtain separate legal, tax or financial advice. Before entering into any transaction or making a commitment to purchase any QDII Product which invests in the offshore product mentioned in this document, you should take steps to ensure that you understand the transaction or product and have made an independent assessment of the appropriateness of the transaction or product in the light of your own objectives and circumstances. In particular, you may wish to seek advice from a financial adviser or make such independent investigations as you consider necessary or appropriate for such purposes. If you choose not to do so, you should consider carefully whether the transaction or product mentioned in this document is suitable for you.

The Bank, its related companies, their directors and/or employees may have positions in, and may effect transactions in, or act as market-maker in, the Offshore Product mentioned in this document. The Bank may have alliances or other contractual agreements with the issuers or manager of the Offshore Product. In addition, the Bank, its related companies, their directors and/or employees may also perform (or seek to perform) broking, investment banking and other financial services for these issuers and managers.

Please note neither the Issuer, manager, investment adviser of the Fund nor any of their affiliates acts as adviser or trustee of the QDII Product or assumes any obligation in

relation to the QDII Product. The Customer is not the Fund holder and has no direct right or interest in the Fund. There is no contractual relationship between the Customer and the Issuer, manager, investment adviser of the Fund or any of their affiliates.
