Basic Information of Offshore Product:	This is a fund constituted in the form of an open-ended investment company with variable capital organized under the laws of Ireland as a public limited company.
Product Risk Level:	P4
Base Currency of Offshore Product:	USD
Type of Offshore Product:	Equity Fund
Issuer:	The management company of the Fund, i.e. Franklin Templeton International Services S.à r.l
Investment Manager:	Legg Mason Investments (Europe) Limited
Custodian:	BNY Mellon Trust Company (Ireland) Limited
Objective and Investment Strategy of Offshore Product:	<p>The Fund seeks to provide long-term capital appreciation</p> <p>The Fund invests at least two-thirds of its net asset value in equity securities listed or traded on regulated markets of companies domiciled in or are conducting a predominant portion of their economic activities in one or more of the following countries, subject to applicable limitations established by such countries on investments by foreign investors: China, Hong Kong, Indonesia, Malaysia, the Philippines, Singapore, South Korea, Taiwan, India, Thailand, Australia and New Zealand. In addition, the Fund may, from time to time, also invest in equity securities of companies domiciled in Pakistan and Sri Lanka. The Sub-Investment Manager seeks to manage the volatility of the Fund by favouring securities that (a) it has identified, through its proprietary security risk assessment process, as having less risk in aggregate relative to the overall risk of the relevant equity market and (b) have demonstrated attractive dividends, high dividend growth, and the cash flow to support such dividends. The Sub-Investment Manager may take additional, non-quantitative factors into account when</p>

	<p>selecting portfolio securities, including the Sub-Investment Manager's macroeconomic outlook.</p> <p>The Fund may also invest in debt securities (government and corporate) that are rated investment grade at the time of purchase, warrants, preferred stocks, collective investment schemes and equity-linked or structured notes whose underlying exposure may be to equity securities. The Fund does not intend to invest in China "A" or "B" shares.</p> <p>The Fund may invest in one or a few countries, either broadly or in particular geographic regions, and generally will be broadly diversified among industries although a substantial portion may be invested in companies operating in the same commercial sector.</p> <p>The Fund does not intend to use financial derivative instruments extensively or primarily for investment or non-hedging purposes. Financial derivative instruments may be used for hedging purposes.</p>
<p>Key Risks of Offshore Product:</p>	<p><u>This section is a summary of the key risks of the Offshore Product which is extracted from the Offshore Product Offering Document for Customer's reference only, and it is not an exhaustive elaboration. Customer is suggested to read all documents listed in below section "Offshore Product Offering Document" for detailed risk disclosure. In addition, Customer should read the Term Sheet, the Risk Disclosure Statement and other sales documents of the QDII Product, to understand the risk factors of the QDII Product.</u></p> <p>Equity Market Risk</p> <ul style="list-style-type: none"> Investing in equity market involves risks, including issuer, industry, market and general economic related risks. Adverse developments or perceived adverse developments in one or more of these areas could cause a substantial decline in the value of equity securities owned by, hence a substantial loss to, the Fund. <p>Asia Markets Risk</p> <ul style="list-style-type: none"> This Fund invests primarily in Asia, which means that it is more sensitive to local economic, market, political or regulatory events in Asia, and will be more affected by these events than other funds that invest in a broader range of regions. <p>China Market Risk</p> <ul style="list-style-type: none"> The Fund invests in China and is subject to the risk of significant change in political, social or economic policy in China, which may negatively affect the value of such investments. <p>Emerging Markets Risk</p> <ul style="list-style-type: none"> This Fund may invest in emerging markets which involve special considerations and risks, including liquidity, volatility, currency, political, economic, legal and regulatory risks. Emerging market issuers may not be subject to the same accounting, auditing and financial reporting standards as developed countries. Emerging markets may have less reliable custody arrangements than mature markets which may also lead to more risk. These factors may adversely affect the value of the securities owned by, hence a substantial loss to, the Fund. <p>Smaller Company Risk</p> <ul style="list-style-type: none"> Securities of smaller companies generally are less liquid and more volatile than those of larger companies; and smaller companies generally are more likely to be adversely affected by poor economic or market conditions. These factors may adversely affect the value of the

securities owned by, hence a substantial loss to, the Fund.

Concentration Risk

- This Fund may select fewer securities, countries or regions in which to invest and this concentration carries more risk than funds investing in a larger number of securities, countries or regions. This can increase the volatility and risk of loss to the Fund.

Custody and Settlement Risks

- The Fund may invest in markets where custodial and/or settlement systems are not fully developed. Such investments may be subject to additional risks with respect to the safe keeping of assets and making of investments, hence the Fund may suffer a substantial loss.

Currency Risk

- Fluctuations in exchange rates between the currency of the underlying securities and the Fund's base currency may adversely affect the value of an investment and any income derived from it. The Fund may seek to hedge or mitigate this risk using financial derivative instruments. Any hedging transactions, while potentially reducing the currency risks to which the Fund would otherwise be exposed, may involve certain other risks, including the risk of a default by a counterparty, and the risk that the Fund's forecast with respect to currency movements is incorrect. In addition, the value of your investment may fall due to changes in the exchange rate between the currency of your share class and the base currency of the Fund. With respect to any share class with "(Hedged)" in its name, the Fund will attempt to hedge the currency risk between the base currency of the Fund and the currency of the share class, although there can be no guarantee that it will be successful in doing so. The use of share class hedging strategies may substantially limit shareholders in the relevant Hedged Share Class from benefiting if the currency of the Hedged Share Class falls against the base currency and/or the currencies that are significant to the Fund's investment strategy, as applicable. The Fund may decide not to hedge the currency risk from the underlying securities, or the abovementioned hedging transactions may become ineffective, in both cases the Fund may suffer a substantial loss.

Derivatives Risks

- This Fund may use certain types of financial derivative instruments (FDIs). These instruments may involve more risk including but not limited to counterparty, volatility, liquidity, leverage and valuation risks. The use of FDIs for hedging purposes may become ineffective, and the Fund may suffer a substantial loss.

Debt Securities Risk

- Investments in debt securities are subject to risks such as credit risk, market risk, liquidity risk, interest rate risk, valuation risk and pricing volatility, which may cause substantial losses to the Fund. The prices of debt securities fluctuate in response to perceptions of the issuer's creditworthiness and tend to vary inversely with market interest rates. Generally, and in the absence of hedging measures, the longer the average weighted duration of a fund, the greater the sensitivity to interest rates. Investment Grade securities may be subject to the risk of being downgraded to below Investment Grade. Debt securities rated below Investment Grade are deemed by rating agencies to be predominantly speculative with respect to the issuer's capacity to pay interest and repay principal and may involve major risk of exposure to adverse conditions. The Fund may be invested in 'non-investment grade' debt securities, which carry more default risk than 'investment grade' debt securities.

Risk of Investing in Distributing Plus Share Classes

- Distributing Plus share classes may pay dividends out of capital. The payment of dividends out of capital effectively amounts to a return or

	<p>withdrawal of an investor's original capital investment or of capital gains attributable to that original investment. Such distribution will result in a corresponding immediate decrease in the net asset value per share of the Share Classes. There is also an increased risk that on a redemption, you may not receive back the full amount invested.</p> <p>Investment Risk</p> <ul style="list-style-type: none"> The value of investments and the income from them can go down as well as up, and investors may not get back the amount originally invested and may suffer a substantial loss to their investments. Past performance is no guide to future returns and may not be repeated.
Fees of Offshore Product:	<p>Management fee: 1.35% of NAV p.a. (The Management fee is charged by the offshore issuer, and will be reflected and deducted from the NAV)</p> <p>Other fees may include performance fee, maintenance fee, custodian fee and other fees and taxes that may be charged in securities investment of offshore products, will be reflected and deducted from the offshore product NAV. You may find more information from the offering documents on offshore products' official website.</p>
Dividend Distribution Method:	Cash Dividend
Governing Law of Offshore Product:	The laws of Ireland
Offshore Product Offering Document:	<p>Legg Mason Global Funds Plc Hong Kong Offering Documents, as updated and amended from time to time, which can be obtained from the Bank or via the official website of the Issuer or the Fund.</p> <p>The above reference to or provision of Offshore Product Offering Documents are intended to assist Customers to access further information relating to the Offshore Product. The Bank undertakes no liability for the accuracy, authenticity or completeness of such documents or other content or information provided by the Issuer or any other parties of the Offshore Product in other ways. The references to or provision of such documents do not constitute an offer, distribution, marketing or reselling of any relevant Fund(s) to the Customers.</p> <p>The Offshore Product Offering Documents may be updated or amended from time to time by the Issuer. The Bank and the Issuer will not, and are not obliged to, notify the Customers of any such update or amendment.</p>
Suitable Customer of QDII Product investing in this Offshore Product):	Suitable for the China resident and qualified non-China resident investor, whose risk profile is C4 or above.
Selling restriction to retail investor in the European Economic Area (the "EEA")	This product is not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (the "EEA").

For these purposes, a retail investor means a person who is one (or more) of:

- (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "MiFID II"); or
- (ii) a customer within the meaning of Directive 2002/92/EC (as amended the "Insurance Mediation Directive"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or
- (iii) not a qualified investor as defined in Directive 2003/71/EC (as amended, the "Prospectus Directive").

Consequently, no key information document required by Regulation (EU) No 1286/2014 (the "PRIIPs Regulation") for offering or selling this product or otherwise making it available to retail investors in the EEA has been prepared and therefore offering or selling this product or otherwise making it available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation. Given the disclaimer, the bank accepts no liability if any customer who's qualified as retail investor in the European Economic Area (the "EEA") subscribes the product.

Disclaimer:

This document does not constitute an offer, an invitation or a recommendation to enter into any transaction. The Bank is acting as principal and not as the adviser of the Customer or in a fiduciary capacity in respect of the Offshore Product mentioned herein or any other transaction, and the Bank accepts no liability whatsoever with respect to the use of this document or its contents.

This document does not have regard to the specific investment objectives, financial situation and the particular needs of any specific person who may receive this document. The information herein is published for information and general circulation only and is not to be taken in substitution for the exercise of your judgment, and you should obtain separate legal, tax or financial advice. Before entering into any transaction or making a commitment to purchase any QDII Product which invests in the offshore product mentioned in this document, you should take steps to ensure that you understand the transaction or product and have made an independent assessment of the appropriateness of the transaction or product in the light of your own objectives and circumstances. In particular, you may wish to seek advice from a financial adviser or make such independent investigations as you consider necessary or appropriate for such purposes. If you choose not to do so, you should consider carefully whether the transaction or product mentioned in this document is suitable for you.

The Bank, its related companies, their directors and/or employees may have positions in, and may effect transactions in, or act as market-maker in, the Offshore Product mentioned in this document. The Bank may have alliances or other contractual agreements with the issuers or manager of the Offshore Product. In addition, the Bank, its related companies, their directors and/or employees may also perform (or seek to perform) broking, investment banking and other financial services for these issuers and managers.

Please note neither the Issuer, manager, investment adviser of the Fund nor any of their affiliates acts as adviser or trustee of the QDII Product or assumes any obligation in relation to the QDII Product. The Customer is not the Fund holder and has no direct right or interest in the Fund. There is no contractual relationship between the Customer and the Issuer, manager, investment adviser of the Fund or any of their affiliates.

This document and the contents contained herein are proprietary to the Bank. No one may copy or forward all or part of this document without the Bank's written permission. Capitalised terms used in this document without definition shall have the meaning given to them under the Term Sheet, Agreement, and/or other QDII Product Documents. In case of inconsistency between the English and Chinese versions, the content of the Chinese version shall prevail and apply.
